

#### 04. What is the most important risk factor for breast cancer?

---

Older age is a major risk factor. Three-fourths of all breast cancers occur in women age 50 or older. Having a sister, mother, or daughter who has had breast cancer also increases your risk. This chart shows what the approximate chances are of a woman getting invasive breast cancer in her lifetime.

Ages	Chances
30 to 40... 	Chances are 1 out of 257
40 to 50... 	Chances are 1 out of 67
50 to 60... 	Chances are 1 out of 36
60 to 70... 	Chances are 1 out of 28
70 to 80... 	Chances are 1 out of 24
